

Java

```
class Solution {  
    public String reorganizeString(String s) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string} s  
 * @return {string}  
 */  
var reorganizeString = function(s) {  
  
};
```

C++

```
class Solution {  
public:  
    string reorganizeString(string s) {  
  
    }  
};
```

C#

```
public class Solution {  
    public string ReorganizeString(string s) {  
  
    }  
}
```
